

M.W. WATERMARK GLASS FABRICATION RECYCLING SYSTEM

Benefits of working with M.W. Watermark:

- M.W. Watermark offers you greater flexibility in water system design. We don't require the purchase of an entire system – if you simply require a filter press to dewater solids in your central collection tank, we can provide just that.
- Why pay a system integrator's premium to expand your filter press or add supplemental presses? Work with the OEM, M.W. Watermark – the authority on filter press technology. Our team has over 20 years of direct experience in the glass fabrication industry.
- When you work with M.W. Watermark, you can continue to utilize your existing tanks and pumps. We don't require the purchase of unnecessary components, as we specialize in supplying you with the best filter press for your particular operation.
- We accept filter press trade-ins of any brand toward the purchase of a new M.W. Watermark filter press.

M.W. WATERMARK – Equipment and Service for Filtration, Process, and Dewatering Needs
